

NSF CAREER Workshop

Speaker: Christina Payne, NSF Program Director

April 23, 2018

10:00am – 12:00pm

307 Gatton College of Business

Learn about the NSF CAREER program from the vantage of an NSF program officer and an awardee. As a UK faculty member in Chemical and Materials Engineering, Christina Payne received an NSF CAREER award in 2016 to develop a molecular-level understanding of the mechanisms by which a class of enzymes, glycoside hydrolases, catalyze the breakdown of biomass into sugars that can be processed further to fuels and chemicals. Her CAREER award included international collaboration and a robust education plan. Dr. Payne has worked in the NSF CBET division since 2017.

Workshop topics will include CAREER guidelines and eligibility, proposal preparation tips, recommendations for integrating research, education and outreach, and the review process.
